

KAILA MAYHO

DevOps & Data Center Operations Engineer

661-265-5815 · kaila9511@gmail.com · linkedin.com/in/kaila-mayho-2416aa168

PROFESSIONAL SUMMARY

Results-driven DevOps and Data Center Operations Engineer with 4+ years of hands-on experience managing global datacenter infrastructure, bare-metal hardware, and network operations. Proven track record deploying, troubleshooting, and maintaining large-scale server environments across multiple sites. Skilled in CI/CD tooling, Linux/Windows administration, Python automation, and cross-functional stakeholder coordination. Seeking mid- to senior-level DevOps or infrastructure engineering roles where I can drive reliability, automation, and operational excellence.

TECHNICAL SKILLS

Infrastructure & Cloud: Bare-metal provisioning, MAAS, iDRAC/iLO/BMC, VMware, VirtualBox, Linux (RHEL/Ubuntu/Debian), Windows Server, Active Directory

Networking: TCP/IP, DNS, BGP, AS-routing, VPN/Firewall, Juniper (JNCIA-Junos, JNCIA-DevOps), CompTIA Network+, Nagios, LibreNMS, Cacti, nfsen, AS-stats

DevOps & Automation: ARM Templates, Terraform, Python, Ansible, Bash/Shell scripting, JSON, Node.js, Git, CI/CD concepts, ticketing systems (JIRA/ServiceNow)

Languages: Python, Java, JavaScript/JSON, SQL, C++, Bash

Tools & Platforms: GNS3, VS Code, IntelliJ, Android Studio, Microsoft 365, macOS

CERTIFICATIONS & TRAINING

AZ-900 · JNCIA-Junos · JNCIA-DevOps · CompTIA Network+ · TestOut PC Pro · TestOut Server+ · AZ-104 (In Progress)

WORK EXPERIENCE

Coding Instructor | CodeFu After-School Program | Sep 2021 – Present

- Designed and delivered K–8 coding curriculum (Java, Python, JavaScript, Scratch) to classes of 10–20 students, improving computational thinking skills.
- Prepared IDE environments (IntelliJ, Eclipse) and mentored students through foundational programming concepts, debugging, and project development.
- Contributed to marketing events and curriculum development initiatives that expanded program enrollment.

System Infrastructure Engineer | i3D.net — Performance Hosting | Jun 2024 – March 2026

Part of the global Hardware & Bare Metal team, delivering hands-on and remote operational support for datacenter infrastructure across worldwide sites.

- Deployed, racked, cabled, and configured 100+ servers and network appliances, reducing mean time to production by coordinating end-to-end hardware lifecycle workflows.
- Led complex hardware diagnostics and root-cause analysis for critical infrastructure failures, restoring service uptime and minimizing client impact.
- Collaborated with international vendors and internal engineering teams to coordinate multi-site expansions, equipment deployments, and planned maintenance windows.
- Authored and maintained knowledge-base articles and runbooks, improving team onboarding efficiency and reducing repeat escalations.
- Proposed and implemented process improvements across move-add-change-delete (MACD) workflows, contributing to team operational maturity.
- Tracked all operational work in ticketing and inventory management systems, maintaining 100% audit-ready documentation.

Operations Support Engineer | i3D.net — Performance Hosting | *May 2022 – Jun 2024*

Provided 24/7 network and server monitoring, client support, and game-server operations for a global hosting provider.

- Monitored global network health using Nagios, LibreNMS, Cacti, nfsen, and AS-stats, proactively identifying and resolving incidents before client impact.
- Resolved server and network incidents end-to-end — from triage and fault isolation to resolution — reducing ticket SLA breaches.
- Provisioned, decommissioned, and maintained dedicated servers and game-server infrastructure running Windows and Linux (Ubuntu, Debian).
- Utilized internal admin panels to deploy and troubleshoot datacenter equipment, ensuring high availability across client environments.
- Supported client escalations with technical troubleshooting and clear communication, maintaining strong customer satisfaction scores.

Administrative Assistant / IT Technician | Conflow Corp. | *Jul 2020 – Aug 2021*

- Managed IT support, printer troubleshooting, and Windows Server administration alongside administrative duties, which included accounts payable/receivable and inside sales.
- Trained new hires on internal systems and office workflows, reducing onboarding time.

Android Development Intern | LA City Bureau of Engineering | *Sep 2017 – May 2018*

- Extended an Android application for LA City's Sidewalk Repair initiative by adding before/after photo tagging, web upload support, and expanded tagging capabilities.
- Ensured cross-device compatibility across Android hardware used by LA City field employees.

EDUCATION

Associate of Science, Information Technology — West Los Angeles College (2022)

Concentrations: Computer Networking Management · Network & Security Management · Network & Information System Security

Bachelor of Science, Computer Science — California State University, Los Angeles (2019)
